

LAB ACTIVITY – 3

Rules for the lab:

- Put all your html and css files in a folder. The name of the folder should be your **roll number**.
- Zip that folder. Follow this naming convention **rollnumber.zip** .
- Make a **readme.md** file telling if any specific assumptions to follow while running your files.
- The readme should be kept in the folder along with your html and css files.
- Readme is necessary.
- **IF THESE RULES ARE NOT FOLLOWED, YOU WILL BE GIVEN A 0 FOR THIS ACTIVITY.**

The task is to implement a website which includes (but not limited to) the following points.

Except for navigation, which should be present in both the pages, following should be implemented in either of the 2 pages.

- Heading and a subheading (Different font styles)
- Navigation with padding
- Page background
- Lists (Unordered/ordered)
- Atleast 2 divs <div>
- Use external CSS
- Add a favicon

Note: Make sure these pages are navigable

Here are screenshots for reference (Note: this does not cover all the points)
